A SANCTUARY COMBAT IN 1586.—Three thousand men on each side now met at push of pike on the bank of the Meuse. The rain was pouring in torrents, the wind was blowing a gale, the stream was rapidly rising and threatening to overwhelm the shores. By a tacit and mutual consent, both armies paused for a few moments in full view of each other. After this brief interval they closed again, breast to breast, in sharp and steady conflict. The ground was slippery with rain and with blood, which afforded no assistance to the combatants. The rain afforded an uneasy footing to the combatants. They staggered

their backs, and still, kneeling or rolling prostrate, maintained the deadly conflict. For the space of an hour and a half the fierce encounter of human passion outmastered the fury of the elements. Noria and Hebanle fought at the

The head of their columns, like the leading ship, The Englishman was wounded in the head and breast; The count was seen to gallop past one thousand musketeers and calivermen of the enemy, and to escape unscathed. But as the strength of the soldiers increased, he boasted itself, the violence of the tempest increased. The floods of rain and the blasts of hurricane at last terminated the affray. The Spaniards, fairly cut down, were compelled to a general retreat; their muskets quivered, were hurled to the ground, and their bridge over the river swept away; the frail and trembling bridge over which they had passed to their unsuccessful assault. The English and Netherlands remained masters of the field. The rising flood, too, which was fast converting the meadows into a lake, was as useful to the conquerors as it was damaging to the vanquished.

The Spaniards—*History of the United Netherlands*, by John Lathrop Motley, D.C.L.

This was the first time I had seen John Bull at any of his watering-places; and I thought it not difficult to account for his resort to them. John is an honest and worthy person as any man in the world, but he is seldom happy at home. He has too much of the physician's timidity, and a deference for the opinion of his servant that overcomes him, and keeps him so constrained at home, while he is led into unreasonable expense. At his watering-places he is free from these shackles; his reserve is overcome by the frankness of his associates; and he can afford to give for the carriages only two with him; and the man can spend no more than the same amount. The latter is deterred, and ready to show his kind and sociable nature, and to mix with those who are richly dressed; and soon shows you what he really is, namely, the very best sort of man in the world. That late war has been very favourable to the improvement of his character, for instead of going abroad to see what men were doing better than himself,

plundered, he is now obliged to make all his summer, and his excursions round his own country, where his hearthstone expands; and, being treated as he deserves, returns home for the winter happy and much improved. At this period, everything was cheap and good at Harrogate, except wine, which, unless it was their claret, which was everywhere good and reasonable, was very bad. The Duke of Buccleugh, however, his little taste, does not much care for, or indeed he goes to the Continent, whether it be with his own native claret, or sophisticated port, he is perfectly contented.—Autobiography of the Rev. Dr. Alexander Carlyle, Minister of Inveresk.

BETWEEN the years 782 and 955, the period when the Papal power was making very rapid strides, there

were no fewer than forty-three Popes, or whose reigns lasted less than a year, and seven not more than a month. Lives of the Abbots of Canterbury. By Walter Farquhar Hook, D.D.

General de Gersach, aide-de-camp of the late King of Prussia, and one of his majesty's most intimate friends, has quickly followed his Sovereign to his grave. He caught a violent cold at the royal funeral which brought on erysipelas in the head, and he died at Potsdam in the evening of the 10th of January. He was 71 years of age.

A piece of gold and silver coin is being struck at the Mint of Paris, and will be issued in the name of the Emperor. It is represented on the coin with a sceptre in his hand, a crown on his head, and wearing an imperial mantle ornamented with bees.
